

Do you want to learn how to get more out of your computer or mobile? Send emails or attach photos? Have you got a tablet but can't get started using it? Want to learn how to text, use whatsapp or zoom family and friends?

The Good Neighbours charities of Didsbury, Withington Assist and Chorlton are running digital drop-in sessions, and one to one home visits as part of a digital inclusion project to support South Manchester residents to engage more confidently with technology.

Digital drop-in sessions take place at:

- Didsbury Good Neighbours on a Tuesday 10-12pm
- Withington Assist on a Wednesday from 2-4pm
- Chorlton Good Neighbours on a Thursday from 10-11:30am.

Our new Digital Inclusion Officer Aidan Mcilroy and a team of volunteers are here to offer personalised support - whatever you need to become more digitally included in a friendly, relaxed community setting.

Simply drop in and say hello with your device or have a go on a provided tablet - whether it be general IT advice about operating digital devices, how to use your device to communicate such as texting and email or getting to know apps such as Zoom or WhatsApp - all queries are welcome. You do not need any prior

experience with technology as this is all part of the learning process.

Aidan can also arrange **1 to 1 home visits** should this be preferable - simply complete an enquiry form at your centre or get in touch with the Co ordinator

Didsbury: 07749 504298

Assist: 434-9216

Chorlton: 881-2925

We encourage you to come and join us at any of the above sessions, have a coffee, meet new people, and enjoy learning in a relaxed environment.
